

ML DQ PALLIATIVE & EOL LES GUIDE

ML LSC EPaCCS (PALLIATIVE & END OF LIFE) LES TEMPLATE

The **ML LSC EPaCCS (Palliative & End of Life) LES** template has been created that covers both national and local requirements for Palliative and End of Life care. You do not need to complete any other template. This template is available through the shared folder in Resource Publisher.

SEARCHES

All searches for the Enhanced Services can be found in the distributed searches folder in Enterprise Searches & Reports.

Please find detailed below information about the searches:

-  ML DQ ICB Palliative + EoL LES v1.2
 -  ACTION Palliative + EoL LES
 -  ACTIVITY EoL LES
 -  ML DQ EARLY Identification Tool v1.4
 -  xBI Reports

All the search's work on the assumption that relevant codes have been added to the patients record from the template 'ML LSC EPaCCS (Palliative & End of Life)'.

ACTION PEoLC LES

This folder contains searches which identify patients who have missing key activity for the Palliative and EoL LES. The key items are – Consent to share, CPR Decision. Preferred Place of Care and Death and Advanced Care Plan.

The ICB are monitoring this information and would like to see an increase in the key items recorded.

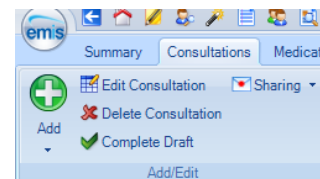

Using the ML LSC EPaCCS (Palliative & End of Life) LES template will ensure you are using the codes captured within the searches.

-  EOLDQ1 Consent to Share NOT Ticked
 -  EOLDQ1 Report
-  EOLDQ2 CPR Decision NOT Recorded
 -  EOLDQ2 Report
-  EOLDQ3 Preferred Place of Care (PPoC) NOT Recorded
 -  EOLDQ3 Report
-  EOLDQ4 Preferred Place of Death (PPoD) NOT Recorded
 -  EOLDQ4 Report
-  EOLDQ5 ACP NOT coded
 -  EOLDQ5 Report

EOLDQ1 Identifies patients where the consent code has not been ticked. Without this code being ticked, the EoL record is unable to be shared with other providers, such as SCR, OOH, Hospices, etc.

88292100000109 Consent given for sharing end of life care coordination record

You should ensure that other sharing mechanisms have also been activated within EMIS for the patient. This is usually completed using the sharing option in the ribbon (see [EMIS Data Sharing in Care Record](#)).

ACTIVITY PEoLC LES

These searches identify the number of patients who have the appropriate code added to their record for the key items being monitored as part of the LES. These should be recorded during the Advanced Care Planning conversations.

The ICB are monitoring this information and would like to see an increase in the key items recorded.

The report 'xACP Key Items Recorded' report will provide you with a list of all patients on the palliative care register and you will see gaps where any key items are missing.

- 🔍 All currently registered patients
 - 🔍 PC001 - Patients on the palliative care register
 - 🔍 ACP
 - 🔍 Consent to Share Ticked
 - 🔍 CPR Decision Recorded - For
 - 🔍 CPR Decision Recorded - Not For
 - 🔍 CPR Discussion
 - 🔍 Preferred Place of Care (PPoC) Recorded
 - 🔍 Preferred Place of Death (PPoD) Recorded
 - 📅 xACP Key Items Recorded
- 🔍 All patients (including deducted and deceased)
 - 🔍 Deceased Patients 1Apr25 - 31Mar26
 - 🔍 Deceased Patients 1Apr25 - 31Mar26 - Place of Death Recorded

Using the ML LSC EPaCCS (Palliative & End of Life) LES template will ensure you are using the codes captured within the searches.

MLDQ EARLY Identification Tool

These searches support the identification of patients who need to be reviewed for consideration to be added to the Palliative Care Register.

The searches should be run twice a year and patients reviewed. There is no code to remove the patients, as it is important that these patients continue to be reviewed.

Further details about the EARLY Toolkit and its use can be found at this link [National EOLC- EARLY Identification and Personalised Care Planning](#)

- 🔍 Combined list of patients to be reviewed
 - 📅 Combined list of patients to be reviewed Auto Report
- 🔍 Patients NOT on Palliative Care Register
 - 🔍 1. Cancer
 - 🔍 2. Heart Failure
 - 🔍 3. COPD
 - 🔍 4. Kidney Disease
 - 🔍 5a Hepatocellular Carcinoma
 - 🔍 5b Liver Disease
 - 🔍 6. Motor Neurone Disease
 - 🔍 7. Frailty and Dementia (Diagnosis)
 - 🔍 8. Idiopathic Pulmonary Fibrosis

Please note - you do not need to download the searches from this link as they are here in your search package.

Midlands and Lancashire CSU

xBI Reports

These reports form part of a number of reports that get collated and sent to ML Business Intelligence to form the LES Monitoring Report.
