ML DQ ECG LES GUIDE v1.1

Local Enhanced Service Template:

A page has been created on the Local Enhanced Services template (**ML ICB Local Enhanced Services**) to provide the correct coding for capturing those patients with appropriate 12 Lead ECG monitoring and results.

CLAIM CODES

In order to be eligible for a claim BOTH these codes need to be entered on the same date. If not claimable, eg done in hospital, do NOT add the Enhanced service administration code.

TICK BOTH BOXES TO ENSURE THE PATIENT IS INCLUDED IN THE CLAIMS

☐ 12 lead ECG	Text		22-May-2025 »
☐ Enhanced services administration	Text	ECG:	22-May-2025 »

Admin

☐ Informed consent for procedure	Text	ECG	07-Oct-2025 »
☐ Procedure declined	Text	ECG	No previous entry
Chaperone			22-May-2025 **Chaperone o...** »
	Text		

MONITORING INFORMATION

Practice based ECGs will be undertaken according to the patients' clinical condition, clinical judgement and clinical care pathways. To perform an ECG on patients in whom it is clinically indicated as per the LES specification:

DIAGNOSTIC ASSESSMENT:
- When cardiac disease is suspected.
- When it is necessary to exclude cardiac disease.
- For the initial diagnosis and management of suspected atrial fibrillation.

MONITORING ASSESSMENT:
- When it is indicated as part of a patient's routine assessment for a long-term condition, medication monitoring or for hypertension review.

Please add one of the following codes to indicate Reason for Undertaking.

☐ Diagnostic assessment	Text		22-May-2025 »
☐ Monitoring of patient	Text		No previous entry

Results

For Framework Requirements, please add result as either NORMAL or ABNORMAL. Further codes from the pick list can be added to define the result.

☐ ECG normal	Text		No previous entry
☐ ECG abnormal	Text		No previous entry
ECG results			No previous entry
	Text		
☐ Referral to GP (general practitioner)	Text		No previous entry
☐ Referral to cardiologist	Text		No previous entry
☐ Choose and book advice and guidance request	Text		No previous entry
☐ ECG not done - please add reason	Text		No previous entry

ECG Searches:

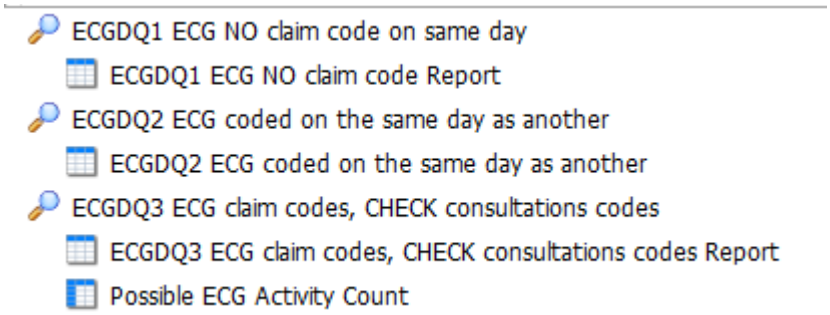

Please find detailed below information about the searches, check population reporting Distributed folder for latest version:

Midlands and Lancashire CSU

All the searches work on the assumption that relevant codes have been added to the patients record from the template 'ML ICB Local Enhanced Services'.

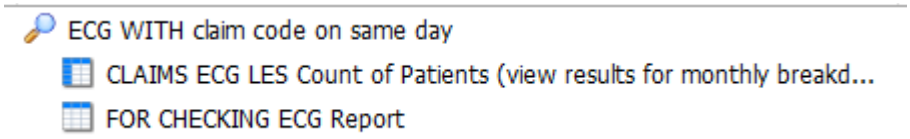

Action folder:

ECGDQ1 – This search identifies patients that may have had an ECG but not had the Enhanced services administration code added at the same date of the ECG. This could be correct if the patient has NOT had the ECG in practice and it is therefore NOT claimable. However, it gives you the option to check that those that should be claimed for are not missed.
ECGDQ2 – Identifies patients who have had more than 1 ECG coded on the same day. As per the spec Where two ECG procedure codes are entered on the same day, payment will be made for one procedure only.
ECGDQ3 – as the claim search has consultation types applied activity must be recorded using the appropriate consultation type, you can use the report to check activity.

Claims folder:

This search identifies how many patients have had the appropriate coding added from the template for a ECG. There are 2 reports, 1 is aggregate and looks at a breakdown for ECG coding number of clinical codes. The 2nd report is a detailed breakdown of activity for ECG LES.

xBI Reports

These reports get collated and sent to ML Business Intelligence to form the dashboard

Please note these searches have consultation types applied to them. Activity must be recorded using the appropriate consultation type. Searches can be found in the action folder to identify any not using an appropriate consultation type.
