ML DQ DIABETES LES GUIDE

ML ICB LOCAL ENHANCED SERVICES TEMPLATE

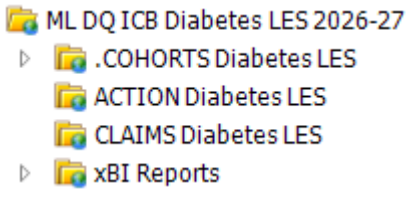

A '**Diabetes**' page has been created in the **ML ICB Local Enhanced Services** template to provide the correct coding for capturing those patients where GLP1s or Insulins have been initiated, or patients have received ongoing care while on Insulin:

SEARCHES

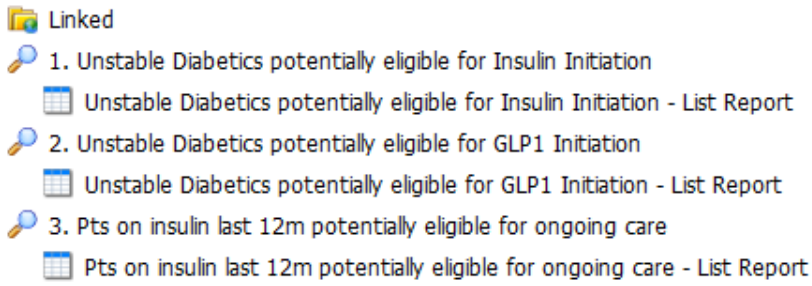

All searches for the Enhanced Services can be found in the distributed searches folder in Enterprise Searches & Reports.

All the search's work on the assumption that relevant codes have been added to the patients record from the template 'ML ICB Local Enhanced Services'.

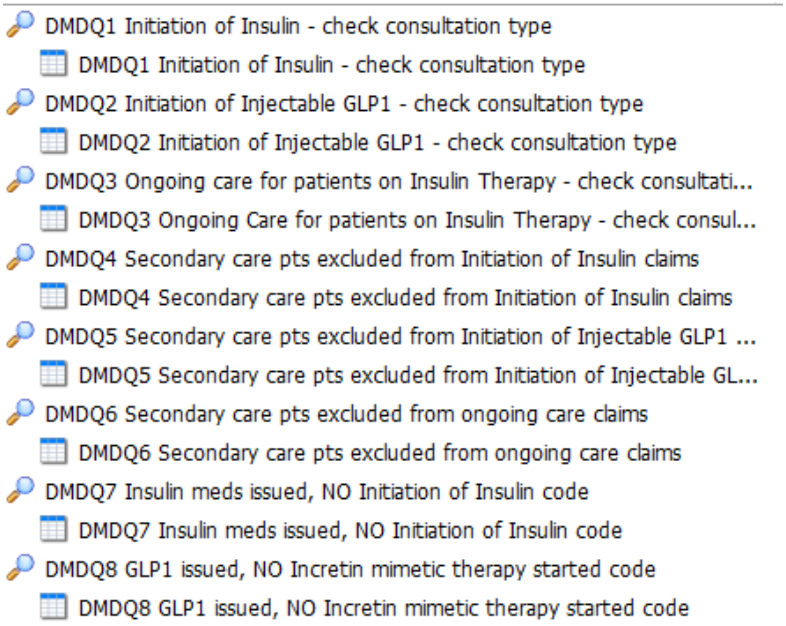

.COHORTS Diabetes LES

These searches should help you identify patients that may be eligible for activities under the LES.

ACTION Diabetes LES

These searches should be actioned before the CLAIMS searches are run to ensure that patients are identified correctly.

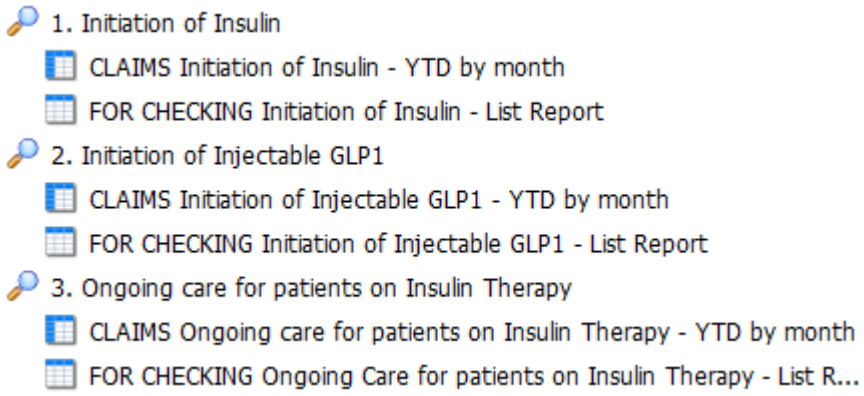

DMDQ1-3: Patients with claim code but not relevant consultation type.
ACTION: If you find any activity in the Action/Check Consultation Type searches that should count towards claims, add a new consultation to the patient's record (on the same date as the excluded one) using an acceptable consultation type and the correct claim / procedure codes. This keeps the original consultation unchanged and ensures the patient appears in the claims searches.

DMDQ4-6: Patients with claim code but appearing as under secondary care.
ACTION: Review patients and **add 927821000000100 Discharge from secondary care diabetes service** if their care is now based in primary care or **1856641000006109 Diabetes monitoring in primary care** if their care is also provided by primary care.

DMDQ7&8: Patients where new diabetic meds have been issued but no claim code has been recorded.
ACTION: Review patients and add claim codes (as detailed below) where necessary.

CLAIMS Diabetes LES

These are your claims searches.

The codes needed for patients to be identified by the searches can be found on the Diabetes page of the ML ICB Local Enhanced Services template however, for reference:

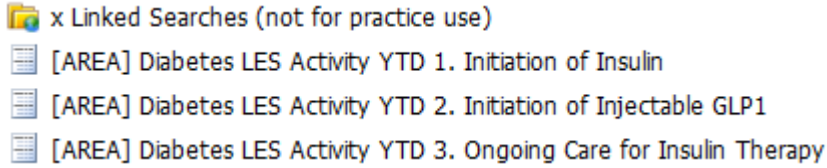

1. **Initiation of Insulin:**
Insulin treatment initiated (345041000000106) **OR**
Insulin Initiation enhanced services administration (344641000000106)

2. **Initiation of Injectable GLP1:**
Incretin mimetic therapy started (702542006)

3. **Ongoing care for patients on Insulin Therapy:**
Enhanced services administration (166221000000105) **AND**
Diabetic on Insulin (170747006)

xBI Reports

These reports form part of a number of reports that get collated and sent to ML Business Intelligence to form the dashboard.
